Column B: Represents the total number of unduplicated incidents reported in columns, C, D, E, F, and H. Column G is also included in this total if the reported incident did not result in an "In School Suspension", "Out of School Suspension" or "Expulsion", but was referred to law enforcement. If multiple resolutions have been entered for one incident, only the most 'severe' resolution will be reported for that incident. For example, if two students are involved in the same incident and one student receives an "In School Suspension" and the other an "Out of School Suspension", only the "Out of School Suspension" is reported.

Column C and H: The values for these columns are defaulted to "0" as District policy requires that each incident have at least one resolution that indicates if the given incident resulted in a "Referral", "In-School Suspension", or "Out of School Suspension".

Column G: This is the total number of incidents that were referred to law enforcement.

Column C: Represents the total count of unduplicated students who received an "In School Suspension", "Out of School Suspension", "Expulsion" or "Referral to Law Enforcement" regardless of incident type. If a student was involved in multiple incidents resulting in more than one suspension, the student will be counted only once in Column C, but multiple time in columns D, E, F, G, H, and/or I (as applicable). For instance, if one white female is involved in two incidents - one resulting in an "Out of School Suspension", the second resulting in an "Expulsion", the student would be counted once in Column C for white female, with one incident reported in Column F and one incident reported in Column G.

Column D and I: The values for these columns are defaulted to "0" as District policy requires that each incident have at least one resolution that indicates if the given incident resulted in a "Referral", "In School Suspension", or Out of School Suspension".
